Validity Study on SNIE 36.6-58

The Outlook in Saudi Arabia and the Consequences of

Possible U. S. Courses of Action

dated 19 September 1958

Most of the longer term estimates in SNIE 36.6-58 remain valid. However, the reduction of outside pressure on the Saudi Arabian regime in the wake of the 1958 revolution in Iraq has made for more stability in the country than we thought likely at the time the paper was written.
